

General Instructions For Completion
of
Permit Application Forms

The regulations for the control and abatement of air pollution require that a permit be obtained prior to the time construction, installation, alternation, or operation of an air contaminant source or facility is begun. In addition, a permit must be obtained when an emission source is:

- (a) to be replaced or altered in such a manner as to have an effect (either an increase or decrease) on the production or control of emissions;
- (b) to be moved to a new location;
- (c) to be operated by a new lease holder or owner.

The attached permit application forms are intended to be self-explanatory, and should, if properly completed, include the information necessary to adequately process an application in a timely manner. It is important that each stack, vent, etc. which may emit air contaminants be separately identified and that each air contaminant which is known or suspected to be emitted from each emission point or source be listed.

A single copy of Form APC 100, the Facility Identification Form, must be completed by all applicants. Multiple copies of Form APC 101, Manufacturing or Processing Operation, may be submitted to accommodate different operations within the facility. Multiple copies of this form may also be used to describe reasonably anticipated alternate operation scenarios, so as to allow for operational flexibility in preparation of the permit. Multiple copies of other forms may be employed in the same manner. Several of the application forms are rather specific. This approach has been employed to simplify the application process for selected operations which are performed by a large number of facilities.

Any information included on the forms, other than emissions data, that divulges production or sales figures, methods, processes or production techniques unique to such person, or would otherwise tend to affect adversely the competitive position of such person, should be noted by inserting the word "confidential" in the margin next to the appropriate item. Any information that is requested to be kept in confidence must be justified by a written statement setting forth the reasons for the request. Information not marked "Confidential" will be available for public inspection.

Applicants are encouraged to contact the Manager of the Huntsville Division of Natural Resources and Environmental Management at (256) 427-5750 if there are any questions. Personnel of the department will be happy to assist applicants in completing the required forms.
