

# TRAFFIC CALMING CHART

### **Step 1: Initiate Traffic Calming Request**

Resident phone call to traffic engineering about problem: 256.427.6850

Questionnaire sent to resident ("Contact")

Contact Returns Questionnaire to Traffic Engineering

### **Step 2: Data Collection**

Traffic volumes and speeds collected for street

Minimum criteria for traffic calming devices: 500 cars/day and an 85th percentile speed of 35 MPH or greater in both directions of travel

If minimum criteria not met, letter will be sent to inform resident; HPD will be notified

#### **Step 3: Petition**

Petition Sent to Contact on eligible streets

Contact Circulates Petition-All households must be polled

Must Have 75% to Continue Process

## Step 4: Design/Placement

Map developed by Traffic Engineering

Placement usually occurs on property lines

Placement avoids manholes, drainage inlets, driveways, mailboxes, etc.

### Step 4: Installation

Schedule determined/Contact informed
Project Installation-Including signing and striping
